```

1 from KalturaClient import *
2 from KalturaClient.Plugins.Core import *
3
4 config = KalturaConfiguration(2365491)
5 config.serviceUrl = "https://www.kaltura.com/"
6 client = KalturaClient(config)
7 ks = client.session.start(
8     "https://www.kaltura.com",
9     KalturaSessionType.ADMIN,
10    "2365491")
11 client.setKs(ks)
12
13 uploadToken = KalturaUploadToken()
14
15 result = client.uploadToken.add(uploadToken);
16 print(result);
17
18 
```

Upload and ingest media with ease

Uploading videos to Kaltura using the API is super simple. Video files can be located on disk, or be specified as an HTML file input. Our jQuery upload widget provides a chunked upload with pause-and-resume functionality and optimization for file chunk size
